EDUCATION

University of California, Berkeley — B.A. Data Science, B.S. Microbial Biology (2025)

EMPLOYMENT EXPERIENCE

Twist Bioscience - Software Engineering Fellow

Dec 2025 - Jul 2026

- Developed backend APIs and internal tooling to power the manufacturing lifecycle of DNA-based products, delivering an on-demand redo workflow trigger that reduced failed-sample turnaround time and increased operator autonomy.
- Collaborated on a Kafka-based distributed orchestration system, developing an event-driven microservice to process QC failure events and execute complex manufacturing recovery logic.
- Optimized QC review service performance by refactoring sequential API calls into a batched pipeline and parallelized I/O-bound calls using ThreadPoolExecutor, reducing latency by 5x.
- Engineered a mock data upload tool for lower environments, accelerating software delivery by eliminating development dependencies on wet-lab teams for test data.

Mercor - AI Model Evaluator

Aug 2025 - Nov 2025

- Collaborated with a leading tier-1 social media company to evaluate and analyze complex model responses for cutting-edge multimodal models. Improved performance and alignment by ensuring adherence to persona, safety, and performance constraints.
- Delivered structured qualitative and quantitative feedback, directly influencing iterative fine-tuning of high-impact AI systems.

Village Market - Operations Associate Intern

Dec 2024 - Aug 2025

- Developed a Python script to parse structured data from PDF invoices, streamlining retail management workflows and saving significant time through automation.
- Drove revenue growth by attending industry conferences and introducing high-demand items to our product line

Biofuels Technology Club - Undergraduate Researcher

Aug 2023 - Dec 2024

- Spearheaded an innovative research grant proposal improving the efficiency of our biodiesel production process that secured \$5K in funding, enabling the launch of a new research sub-team.
- Researched algae-based biodiesel production and presented at the BERC Energy Summit to a technical and general audience.

SKILLS & CERTIFICATIONS

Technical Skills: Python, PostgreSQL, Git, GitHub Actions, FastAPI, REST APIs, Kafka, Docker, SQLAlchemy, Pandas, RAG, Matplotlib, Scikit-learn

Certifications: Generative AI Fundamentals (Databricks), Graph Data Modeling (Neo4j)
